

## Theory and practical exam pattern for physiology

### **Theory : pattern of questions**

15 Marks x 2 = 30 marks	structured essay
8Marks x 5 = 40 marks	short essay
1Marks x 10 = 10 marks	one word
4 Marks x 5 = 20 marks	physiological basis (three questions) Diagrams (2 questions)

**Total 22 questions = 100 marks**

### **Practical exam pattern**

#### Practical –I

OSPE: 5M x 4 stations =	20Marks
Human experiments:	10Marks
Minor haematology:	10Marks
	<hr/>
	40 Marks

#### Practical –II

Clinical examination =	20 Marks
Major haematology =	20 Marks
	<hr/>
	40 Marks

Practical total = 80 marks	}	100 marks
Viva voce = 20 marks		

Details of practical:

1. Four OSPE stations : 5minutes /station = 20 minutes

a. Observation and evaluation stations

Eg: Interpreting haematological data/lab tests/calculations etc

b. Amphibian graphs skeletal / cardiac

Eg : interpret/draw/discuss

c. Interactions with standardized patients

Eg: Clinical and communication skill testing

d. Interpreting clinical conditions

Eg : simulated patients/

Photographs/investigation data to be used

**TWO stations in OSPE to be observed stations**

2. MCI competency book to be followed for haematology, human and clinical examination.
