#### **Sub: Practical challenges in pandemic prevention: the case of vaccine use, organised by School of Health Policy and Planning Studies-Reg:**

In the context of COVID-19 continuing as the most distressing health problem and disturbing the social life, everybody is looking for a vaccine. Vaccine perhaps is not the only solution and should be used along with other non-pharmacological interventions which are practiced now. The industry, scientist and Government are all working hard to make the vaccine a reality. The medical fraternity and people should have the right information about this technical solution. We are organizing this webinar to empower our faculty and students under KUHS with the knowledge on Vaccine development and planning of delivery system. The details are given below,
